

Tinder Plus: The Next Level of Tinder

Introducing Tinder Plus, a premium addition to the Tinder experience. With Tinder Plus we're giving our members access to their two most-requested features through Passport and Rewind, as well as unlimited liking capabilities.

With Passport, we've created an entirely new way to facilitate global connections on mobile. Passport lets you change your location to connect with people anywhere around the world. It's like teleporting to a different location. Search by city or drop a pin on the map and you can begin swiping, matching and chatting with Tinder members in a destination of your choice. Navigate between your current location and new destinations. Passport creates real, one-on-one connections with people across the globe. Whether you're planning vacations and business trips or simply expanding your social network, with Passport, you're swiping before you arrive.

Rewind lets you take back your last swipe. If you accidentally swiped left on someone you want to get to know, they're no longer lost in the Tindersphere forever. Now you can get him/her back with the touch of a button.

Expressing interest in someone is as easy as swiping right on Tinder. The validity of the swipe is core to the Tinder experience. Tinder works best when swipes are genuine reflections of a member's desire to connect. Limitations on rewinding and right-swiping give members more incentive to make sure their swipes are honest. For power members who want to express interest in a large number of people, Tinder Plus grants unlimited liking capability.

Tinder Plus is available to all members worldwide.

Swipe on!

Love,

The Tinder Team
